### PROFESSIONAL SUMMARY

---

Highly skilled Front-End Developer and Software Expert with over 5 years of experience working with cross-functional teams of developers, engineers, and project managers. Proficient in time management and organization – executing and completing projects within a time frame, and collaborating remotely with teams to develop innovative, scalable solutions that enhance user experience and drive business growth. Passionate about optimizing operational efficiency, reducing costs, and delivering exceptional value to clients. Strong track record of successfully launching new products and services, with a focus on building and maintaining strong stakeholder relationships at all levels.

### WORK EXPERIENCE

---

#### ❖ Snr. Front End Developer - Qshelter Limited, Lagos, Nigeria

Sep. 2023 – Present

- Designed and built the front end of “Contribuild” as a contract gig, a platform to save towards purchasing a home, using technologies like React and Typescript, impressing the team and securing a full-time senior role within a week.
- Implemented critical features like responsive design, intuitive navigation, and interactive elements to the Contribuild platform, enhancing user experience and engagement.
- Collaborated with engineers to conceptualize and develop the “Qshelter platform”, bringing complex features to life in an agile and efficient manner.
- Delivered key functionalities in the Qshelter platform that contributed to attracting 100,000 visits and achieving a remarkable 90% user retention rate within a month.
- Rapidly developed the “Mofi housing platform’s MVP” within a 15-day sprint, demonstrating strong front-end development skills and dedication.
- Developed the Renewed Hope housing platform in a collaboration between Qshelter and the Federal Government of Nigeria spearheaded by the Federal Mortgage Bank of Nigeria thereby launching the platform and having over 50,000 users registering and showing interest in buying properties and over NGN200M in sales already in one month of launching the platform.

#### ❖ Front End Developer - Mage Inc, Boston, Massachusetts, USA

Mar. 2022 – Oct. 2023

- Developed the organization’s landing page and swiftly resolved existing bugs, ensuring an error-free first impression for users.
- Designed and built the “Creator Store” from scratch, attracting over 6,000 users and achieving an impressive 80% retention rate with its intuitive interface and cutting-edge product purchase experience.
- Developed and maintained the “Creator Dashboard”, empowering creators with data-driven insights and comprehensive performance tracking to manage their progress and interactions with customers.
- Created payment infrastructures like wallets and checkouts, enabling creators to securely monetize their work directly on the platform.

- Developed and integrated a Virtual Card system, streamlining the creator payment experience and enabling seamless transactions through their platform wallets.

❖ **Front End Developer(Contract) - Reef Financial Solutions Limited, Abuja, Nigeria** **Dec. 2022 – Aug. 2023**

- Designed and built a highly responsive web landing page for the company, driving user engagement and increasing digital brand awareness by 90%.
- Developed the “Mongoro Service application” by building the landing page, incorporating responsive design and interactive elements, and laying foundation for future functionalities.
- Implemented a robust CI/CD pipeline for seamless production deployment, optimizing performance and ensuring application stability with an average uptime of 95%.
- Constructed an interactive and data-driven Admin workspace and dashboard, empowering efficient application management and operational tracking.
- Developed a comprehensive B2B platform for merchants, enabling streamlined processing of payments, invoices, and internal business activities.

❖ **Platform Engineer (Contract) - Tryortho.co, San Francisco, California, US** **May 2022 – Jul. 2022**

- Streamlined TryOrtho’s payment processing by seamlessly integrating over 50 payment and fintech platform web SDKs within a remarkable 3-week timeframe, boosting efficiency and user experience.
- Successfully revamped the organization’s landing page, achieving set goals, and enhancing user engagement.

❖ **Front End Developer, Kpie Technologies, Lagos, Nigeria** **Feb. 2020 – Oct. 2021**

- Translated a brief from the Chief Technology Officer (CTO) into a visually appealing and functional PPMI website, delivering 3 days ahead of schedule.
- Enhanced the user experience of the “MultiGrid Limited website” by implementing UX best practices, ensuring an intuitive and engaging user journey.
- Collaborated closely with backend developers to successfully bring the “Hua Ou Brick website” to life, showcasing strong teamwork and cross-functional skills.
- Built “SellMega” from scratch, adhering to UX principles to create an effective and user-friendly e-commerce platform, demonstrating a solid front-end expertise.
- Contributed to the development of “SafeScout”, a collaborative reporting app for improving communication and work efficiency between employees and employers.
